Re: Andamiro Smart Cube Amusement Game Version 1.0

Dear Mr. Newell,

Thank you for submitting the Smart Cube amusement game to us for review. According to information received from the manufacturer, Andamiro, the software in the Smart Cube is identical to the software in the Magic Shot amusement game approved in March of 2014. The only difference is that the Smart Cube game is available in a smaller cabinet. It is my understanding the game plays as follows:

The object of the Smart Cube Game is to position the "s" shaped arm into one of the target holes. The player positions the arm to the desired prize by holding a button on the game. When the arm reaches the target hole the player releases the button. If the player successfully places the "s" shaped arm into one of the target holes that prize is dispensed. The Smart Cube Game price per play can be adjusted based on the location and value of the prizes. You were advised that the maximum wager is \$3.50 and maximum prize is \$500 for locations where minors are allowed to play in Washington.

The Smart Cube game meets the definition of an amusement game (RCW 9.46.0201) and is approved for use as a Group V, hand/eye coordination (WAC 230-13-035) amusement game in Washington State.

Please be advised that any modifications to the Smart Cube amusement game software or associated equipment must be provided to us for additional testing and review. In addition, amusement games operated in Washington must not have settings that allow the operator to control the outcome of the game (auto percentaging). The approval of this equipment may be rescinded at any time if problems are found by the Commission or changes to the Washington Administrative Code (WAC) impact this approval. If you have any questions or concerns, please contact Sonja Dolson at (253) 671-6283.

Sincerely,

Mark Harris
Assistant Director
Field Operations Division
